

# MaxQore

MaxQore is an advanced program for effective business growth and partner team development with a 860% reward in BNB coin from a single cycle.

# BASIC FACTS ABOUT MAXQORE

Level activation and rewards are in **BNB (BEP-20)**.

**39**

39 places, 3 lines.

**%**

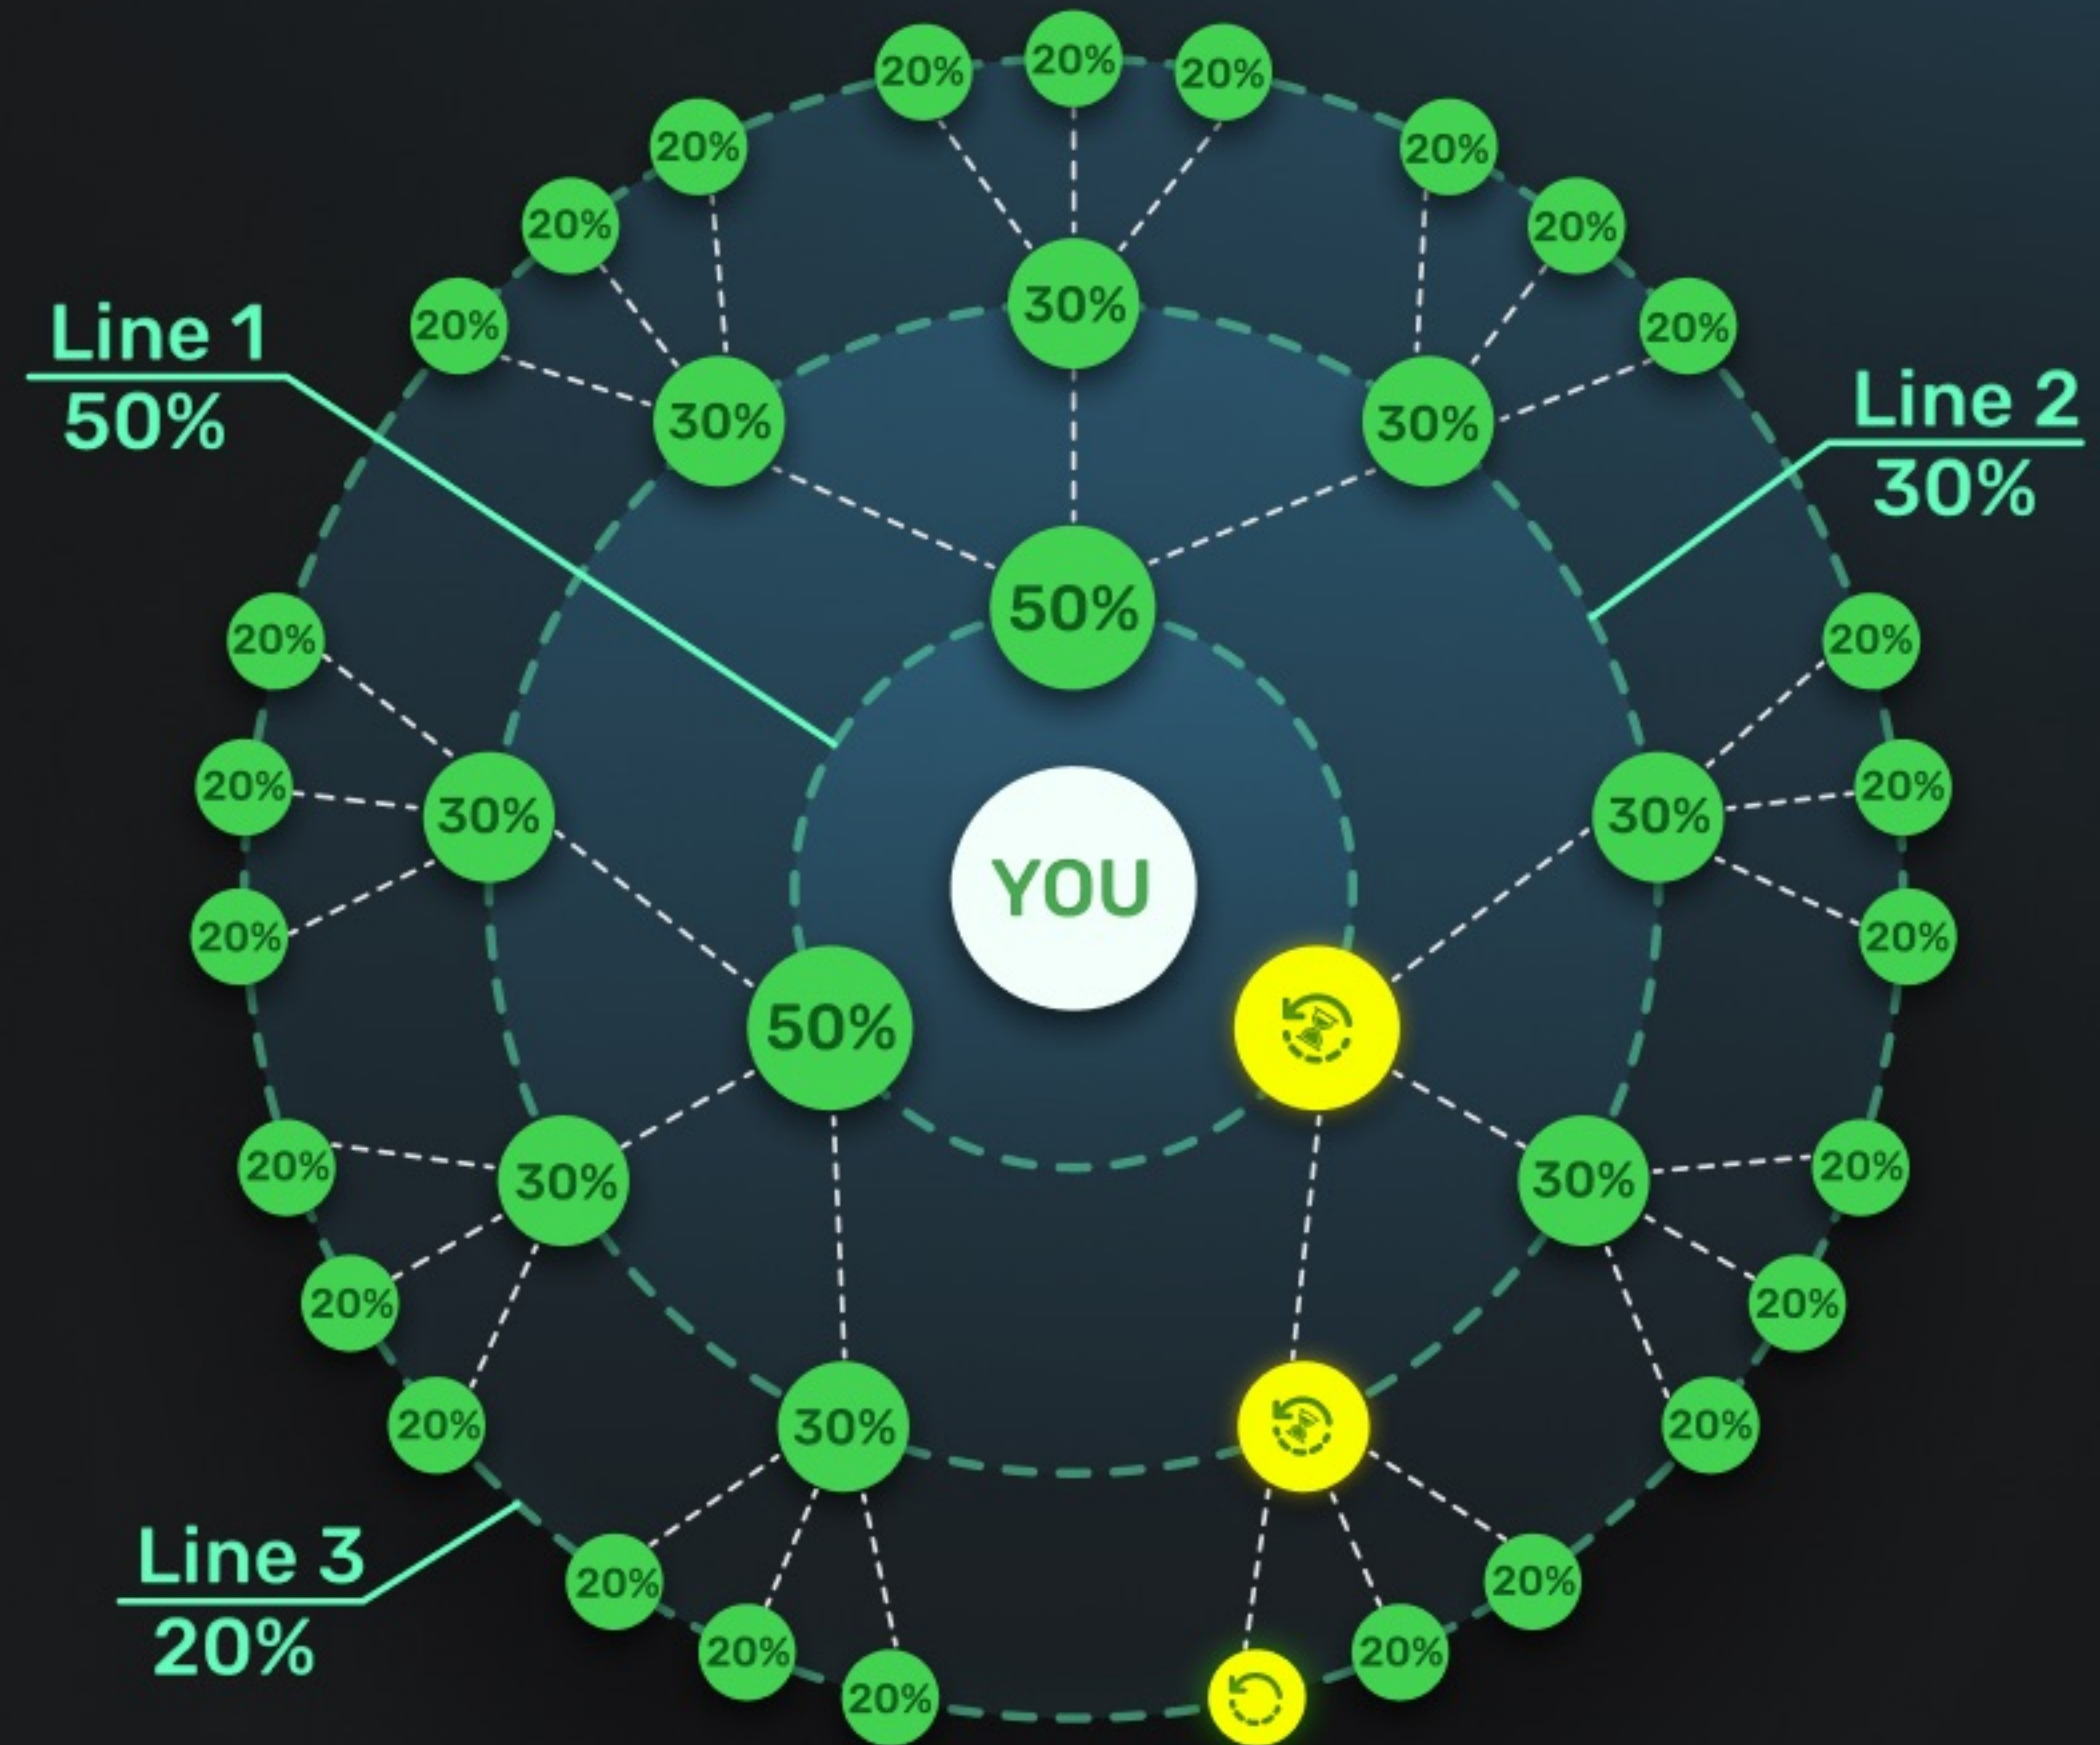

+860% reward per cycle.

Autorecycle occurs when the last **place** in each line is occupied.

The next-to-last place is stored while waiting for the last place to be filled, and then 3 transactions together make a recycle.

# MINIMISED VERSION

Here is an example of a minimalistic display of your level status

# KEY MARKETING FEATURES

 **Cycle** is a level with all 39 places completed.

 **Recycle** occurs automatically after each cycle.

 **Upgrade** is the activation of a next more expensive level.

 **Level freeze** occurs when a level is complete, but the next level is not activated.

 **Overtaking** occurs when your downline partner has activated more levels than you.

 **Spillover** means that a place in your level is occupied by a partner invited by other members.

 **Direct partner** - a partner took a place in your level

 **Spillover from above** - a partner of your upline took a place in your level

 **Spillover from below** - a partner of your downline took a place in your level

 **Gift** - a partner of your downline made an upgrade earlier than them, so he took a place in your cycle

# MECHANICS OF MAXQORE CYCLE

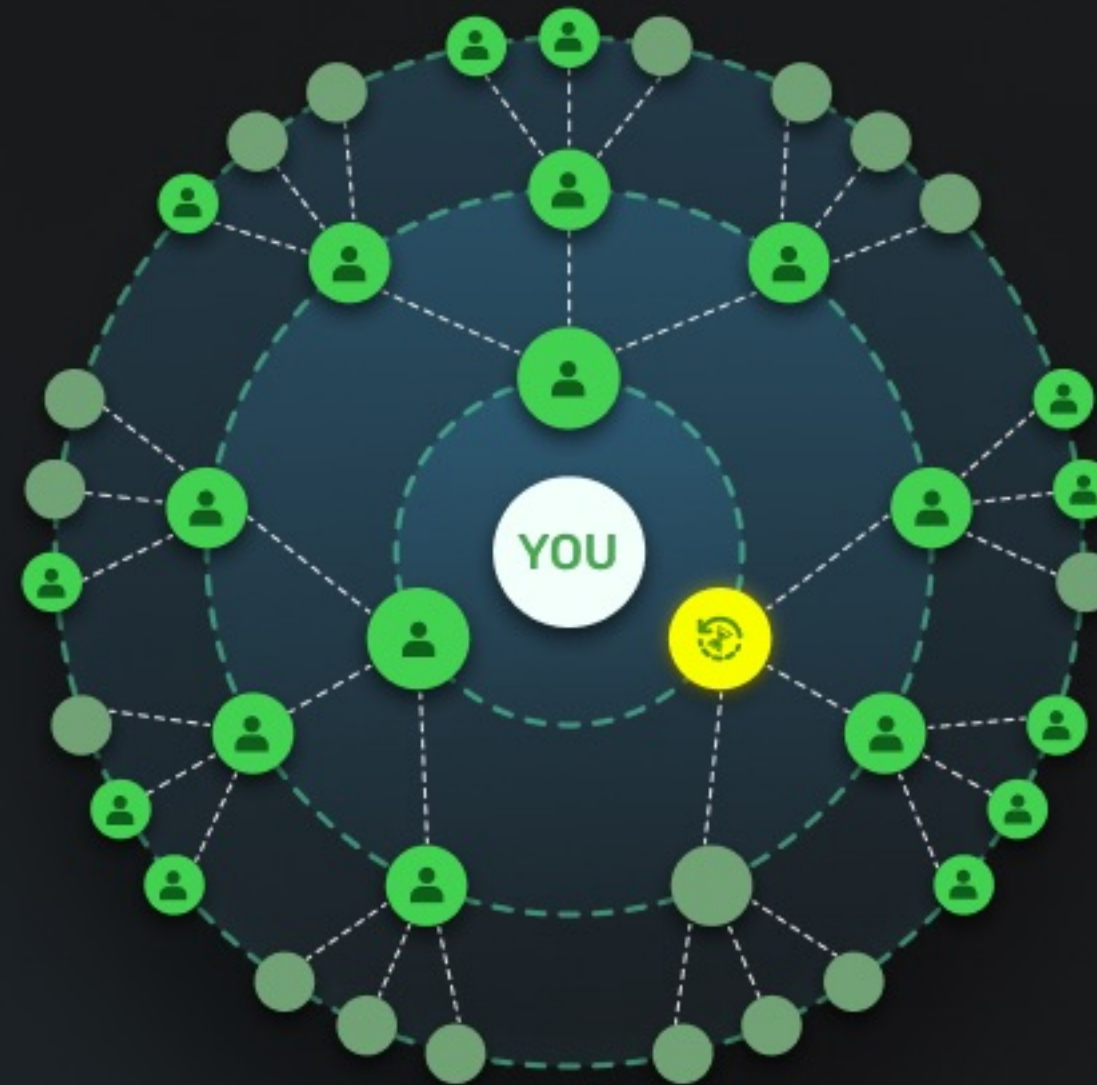

## Line 1

Line 1 is filled in first. Each place brings you a reward of 50% of the level cost. The reward for the last place on the line is stored for a level recycle.

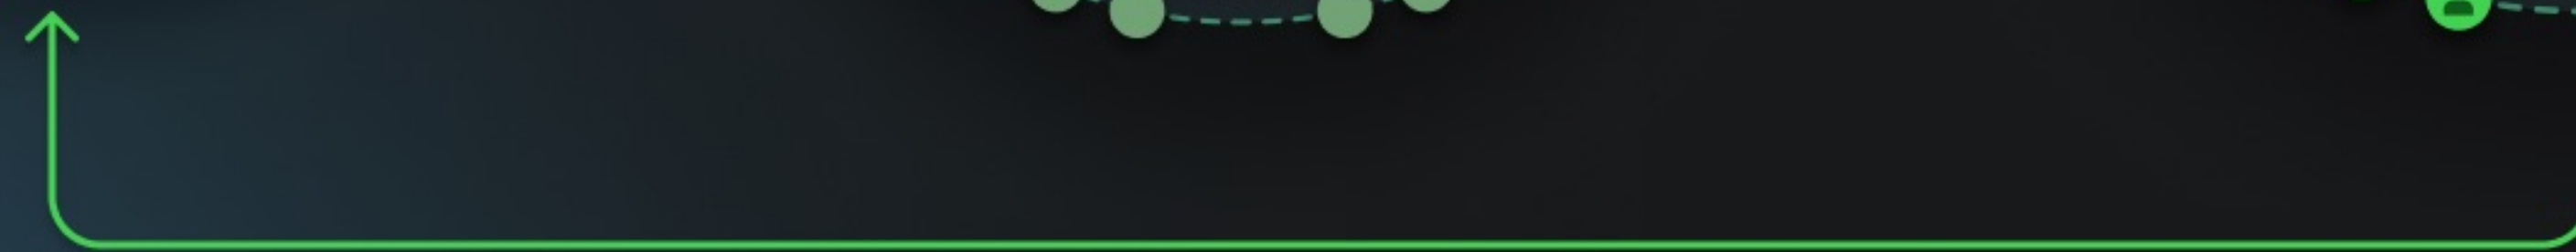

## Line 2

Line 2 is filled in second. Each place brings you a reward of 30% of the level cost. The reward for the last place on the line is stored for a level recycle.

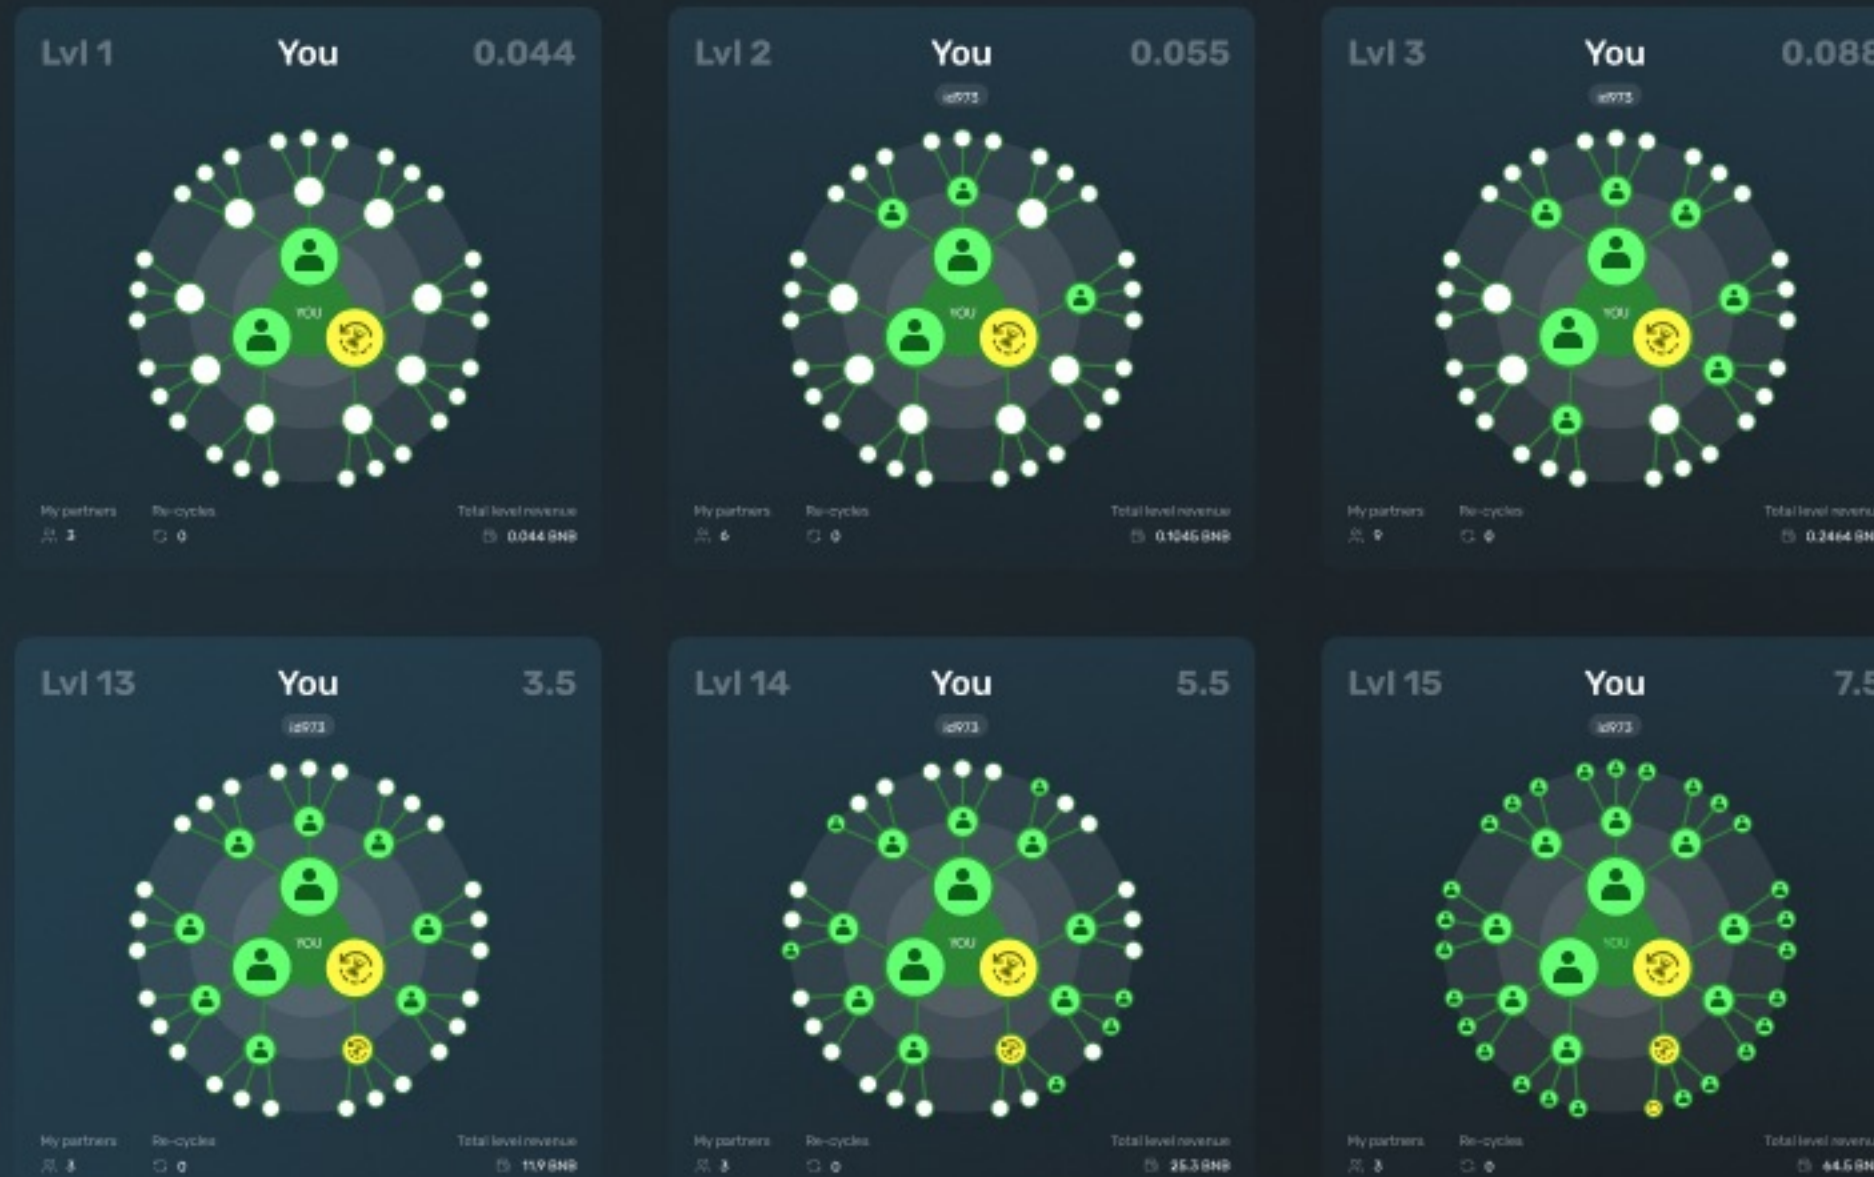

## Line 3

Line 3 is filled in third. Each place brings you a reward of 20% of the level cost. The reward for the last place is summed up with the stored rewards for the last places on lines 1 and 2 and opens a new cycle of the same level for you.

# MAXQORE LEVELS

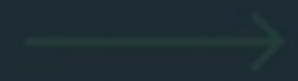

There are 15 levels in the program with the cost starting from 0.044 BNB. Activate new levels to prevent the previous ones from freezing. One cycle yields 860%

Lvl	Value (BNB) 
1	0.044
2	0.055
3	0.088
4	0.122
5	0.177
6	0.26
7	0.38
8	0.54
9	0.78
10	1.15
11	1.7
12	2.4
13	3.5
14	5.5
15	7.5

MaxQore levels are activated sequentially. Each level requires activation of the previous one

# STAGE-BY-STAGE ACTIVATION

On day 1, levels 1–5 will be available for activation.

DAY 1

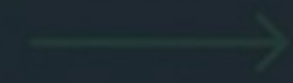

Lvl 1  
0.044 BNB

Lvl 2  
0.055 BNB

Lvl 3  
0.088 BNB

Lvl 4  
0.122 BNB

Lvl 5  
0.177 BNB

On day 2, levels 1–10 will be available for activation.

DAY 2

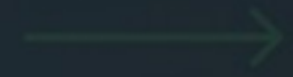

Lvl 6  
0.26 BNB

Lvl 7  
0.38 BNB

Lvl 8  
0.54 BNB

Lvl 9  
0.78 BNB

Lvl 10  
1.15 BNB

On day 3 and onwards, levels 1–15 will be available for activation.

DAY 3

Lvl 11  
1.7 BNB

Lvl 12  
2.4 BNB

Lvl 13  
3.5 BNB

Lvl 14  
5.5 BNB

Lvl 15  
7.5 BNB

- **Teams** will find it easier and more efficient to plan the activation of levels together, and provide maximum care and guidance to newcomers.
- **Leaders** will get more time to activate all levels, prevent overtaking by team members, and get extra profit from spillovers.
- **Newbies** will have more time to understand how the program works, and activate levels without rushing.

As you know, level freeze occurs if you don't activate the next level. On the start day, this rule will not apply to level 5, and on the next day, it will not apply to level 10.

As soon as all levels are available for activation, the freeze will work according to the general rules.
